The song

A sunny love: a musical recipe?

- A universal scope

The theme of the song is a couple's life journey: the first time they met, the challenges, the common strength.

- Lyrics that hit the core

The lyrics are poetic and focus on the essence of human relationships. Honeymoon (or love at first sight), wounds, external hostility, and the art of nurturing the inner fire of love.

- A cool musical atmosphere

Jamaica and California: a sunny musical cocktail! With a groovy rhythm, the melody is sung by Rudiger and the choirs answer him. We listen again and again to this potential hit that stays with you wherever you go!

- A top-notch interpretation and production

Rudiger, a Californian singer, is particularly comfortable, delicate, and intense. The harmonies of the choirs respond to his deliciously raspy voice. The velvety sound of saxophone perfectly mingles with the harmonies of the final choir.

- A particularly successful alchemy

It's not easy to create "a hit". Everything must be exactly in its place and discreet enough, so the listener focuses on the core: the pleasure of listening to a song that seduces with its apparent simplicity. *"Born to Love Baby, is one of those songs with a magical power that immediately seduce you and stay in your memory!"*
